

Environmental Policy

Stratford Tools believe that in order to be a good neighbour, the company will adopt best practical means to minimise its impact on the environment and to meet its legislative requirements.

We are therefore committed to reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods.

Our policy is to:

- › Minimise our waste and reuse or recycle materials used directly or indirectly in our processes as much as possible.
- › Minimise energy and water usage in our buildings, vehicles and processes in order to conserve supplies, and minimise our consumption of natural resources, especially where they are non-renewable.
- › Operate and maintain company vehicles (where appropriate) with due regard to environmental issues as far as reasonably practical.
- › Apply the principles of continuous improvement in respect of air, water, noise and light pollution from our premises and reduce any impacts from our operations on the environment and the local community.
- › As far as possible purchase products and services that do the least damage to the environment.
- › Assess the environmental impact of any new processes or products we intend to introduce in advance.
- › Ensure that our staff are aware of the environmental impact of their activities and encouraged them to do the same.
